<b>APFS Number</b> F2019048199	<b>NAICS Code</b> 541519	<b>Component</b> Transportation Security Administration	<b>Sub-component</b> None
<b>Contract Vehicle</b> DWAC/FirstSource II	<b>Dollar Range</b> \$250,000 to \$500,000	<b>Small Business Program</b> SB	<b>Contract Status</b> New Requirement
<b>Estimated Release</b> Sept. 4, 2019		<b>Anticipated Award Quarter</b> Q4 2020	
<b>POC Name</b> Julie Labra	<b>POC Phone</b> 2405685698	<b>POC Email</b> julie.labra@tsa.dhs.gov	

<b>Description</b> The purpose of this procurement is to acquire, as a brand name or equal, of the UiPath Enterprise Robotic Process Automation (RPA) Platform software licenses for the Technology Solutions Division (TSD) RPA initiative. Robotic Process Automation (or RPA) is the technology that allows anyone today to configure computer software, or a "bot" to emulate and integrate the actions of a human interacting within digital systems to execute a business process. RPA bots utilize the user interface to capture data and manipulate applications just like humans do. They can interpret, trigger responses and communicate with other systems in order to perform on a vast variety of tasks.
---

<b>APFS Number</b> F2019048207	<b>NAICS Code</b> 518210	<b>Component</b> Transportation Security Administration	<b>Sub-component</b> None
<b>Contract Vehicle</b> DWAC/FirstSource II	<b>Dollar Range</b> \$2,000,000 to \$5,000,000	<b>Small Business Program</b> SB	<b>Contract Status</b> New Requirement
<b>Estimated Release</b> March 28, 2020		<b>Anticipated Award Quarter</b> Q3 2020	
<b>POC Name</b> Julie Labra	<b>POC Phone</b> 2405685698	<b>POC Email</b> julie.labra@tsa.dhs.gov	

<b>Description</b> The Transportation Security Administration (TSA) Intelligence & Analysis (I&A) Secure Flight (SF) program and the Information Technology (IT) Security Threat Assessment Monitoring Platform infrastructure has a requirement for the activation of the dark CPUs on the remaining resources. This requirement also supports the expansion of CPU (Central Processing Unit) and Memory within the Secure Flight storage infrastructure. These upgrades are needed to increase storage capacity, build out new servers, new Test, Development and Production environments and to maintain performance levels within the Secure Flight infrastructure. The price will also include one year of 24x7 support. This will allow for growth within our current frames already in place. Anticipated Strategy: TBD

<b>Description</b> The Transportation Security Administration, Law Enforcement, is using RSA hard tokens for two-factor authentication on their mission essential application. During mission operations, the users need to use the RSA hard tokens. This process has been used for LE applications from 2005 until the present time. TSA requires two-factor applications to protect security sensitive information and to comply with TSA Technical Standard for Remote Access TS-016, NIST 800-53 IA-2. RSA hard tokens are used when a PIV card cannot be used due to mission and technical issues. TSA currently owns 350 perpetual RSA user tokens/licenses and annual maintenance for LE users. These existing regular maintenance on the RSA software expires on 5/31/2020 and most of the tokens on or about, 8/31/2020. In order to retain this capability for LE users, Information Technology (IT), Application Development Division (ADD) has a requirement for ongoing maintenance for RSA software and the hard tokens.

<b>POC Name</b> Ted Melancon	<b>POC Phone</b> 609.813.3180	<b>POC Email</b> Ted.Melancon@tsa.dhs.gov	

<b>Description</b> Software licenses and maintenance for a period of one (1) year for approximately over 50 Open Text Licenses that can access SABRE Aircrews by all system users at the Special Operations Center (SOC), Continuity of Operations (COOP) sites and in NJ for testing. TSA requires an enterprise class remote access solution to allow users to access the Solaris Unix-based applications from Microsoft Windows-based client workstations. The Program is required to function in a high availability, controlled and secure environment through the use of a client / server solution. This procurement includes maintenance, support and upgrades for a base period (one year) and four (4) option years for the OpenText Exceed TurboX perpetual licenses, that TSA owns and are currently in use on the Program. This will provide TSA with access to upgrades, fixes, and technical support for these licenses.

<b>POC Name</b> Scott Johnston	<b>POC Phone</b> 256-310-8115	<b>POC Email</b> Scott.johnston@fema.dhs.gov
<b>Description</b> <p>In the FY20 OMB briefing, the CDP was provided a nominal amount to support the operations and maintenance of CDPs LAN. This action was more clearly defined in FEMA-CDP-Action-Office for FY21 Budget Congressional Briefing Prep Materials ACT:0900813, where the CDP was tasked to provided talking points for Mr. Gorman's FY21 Budget Congressional Briefings; specifically on page 2 of document 'NPD FY2021 Budget Briefing to Congress', talking points were provided to the question posed about the impact of concerning FA cost reduction for CDP equipment. The NPD inserted response stated the FY2020 enactment provided one-time increases within the CDP which was applied to cover the purchase replacement of equipment and the upgrade of CDP servers. This eCAPS TaskID is to execute the server upgrade.</p>
